

CLAIMS

What is claimed as new and desired to be protected by Letters Patent of the United States is:

- 1 1. A method for call control, comprising:
2 receiving a call at a communications device, the call being routed over at least one
3 IP network;
4 controlling the call using an IP device connected to the IP network via a control
5 gateway.
- 1 2. The method of Claim 1, wherein the step of controlling the call further comprises
2 the step of controlling the call using an SIP protocol.
- 1 3. The method of Claim 1, wherein the step of controlling the call further comprises
2 the step controlling the call using a protocol having a call control portion and a voice control
3 portion.
- 1 4. The method of Claim 1, wherein the steps of controlling further comprise
2 providing a service application under the control of the IP device.

1 5. A system for call control, comprising:
2 a control gateway providing control access to an IP network;
3 at least one IP device connected to the control gateway, said IP device configured
4 to control a call.

1 6. The system of Claim 5, wherein the IP device controls the call using an SIP
2 protocol.

1 7. The system of Claim 5, wherein the IP device controls the call using a protocol
2 having a call control portion and a voice control portion.

1 8. The system of Claim 5, wherein the IP device provides a service application for
2 controlling the call.

1 9. The system of Claim 5, further including a communications device for receiving
2 the call.
